The information-oriented society is coming out for the popularity of a personal computer and the Internet. And in the new Education Ministry guideline, new subject 'Information' is started in a senior high school as a compulsory subject. Therefore, redesigns of computer literacy education are under pressure for the institutions of higher education such as university. That was called 2006 problem in the field of information processing education at higher education. In this short paper, we discuss about a computer literacy education after 2006 based on the results of questionnaire in the 'Information Literacy' class in Kobe Women's Junior College.</p>
<p>■ <i>The Ronko</i> 52, 13-24 (2007)</p> <p>Utterance Reformulation in "Larry King Live," an American Talk Show: Suggestions for Enhancing English Language Learners' Speaking Skill</p> <p>Takahiro IWANAKA</p>	<p>reformulation, corpus, talk show</p>	<p>The present study aims to investigate how reformulation is employed by native speakers of English in "Larry King Live," an American talk show, and to obtain suggestions for teaching reformulation in English class. For this purpose, a corpus of 2,400,000 English words was made and 508 reformulation samples were obtained. Next, an analysis was given to show the relationship between original utterances and reformulated ones. The result of the analysis showed that reformulation in the talk show falls into two categories: reformulation based on linguistic resources and reformulation based on inference. The former consists of two subcategories: concept level reformulation and predicate/argument structure level reformulation. It follows that there are three levels of reformulation: concept level reformulation, predicate/argument structure level reformulation, and inference level reformulation. It was finally argued that English teachers should be acquainted with these three levels of reformulation and that they should be presented systematically in class according to the learners' proficiency.</p>

A Study on Child-Raising Families after Implementation of Basic Law for a Gender-Equal Society

Nobuko NAKAGAWA
Akiko NIHEI

The Basic Law for a Gender-Equal Society, low fertility, child-care leave system, employment situation, sharing the housework

The Basic Law for a Gender-Equal Society came into effect in 1999. Although a system in order to address the declining birthrate was regulated as one of the concrete measures under the law, only slow progress has been made in Japan.

We conducted a survey to clarify why there is no remarkable recovery in fertility rate and those who are actually raising children participated in the survey. 180 families participated in the survey. This research aims to find problems which child-raising families have, to suggest a system they actually need and to reveal the problems in current systems.

This research is an introduction to further studies which promote effective cooperation from our corporate society.

Balsamic vinegar, Blood fluidity, Laser Doppler Blood Perfusion Imager, Micro Channel Array Flow Analyzer (MC-FAN)

The balsamic vinegar is made Italian quality, healthy vinegar from grapes. It contains polyphenol three times more compared to Kurozu (a brewed rice vinegar), which is known to similar manufacturing process to balsamic vinegar, and is reported to have improving effect on whole blood fluidity. We examined blood fluidity in the hypodermic micro blood vessel by non-invasive method after consumption of balsamic vinegar appeared on the market as the commercial beverages. Taking balsamic vinegar resulted in the tendency of acceleration of superficial tissue blood perfusion measured by the PeriScan System that was a Laser Doppler Perfusion Imaging system. Thus balsamic vinegar would be promising to be blood fluidity improving effect.

A Proposed Plan for Atrium of
Kobe Women's Junior College
Hiroko HOMBO
- Planning for
Campus,
Atrium,
Place of
Relaxation,
Cozy Space
- A plan for an atrium of Kobe Women's Junior College is proposed. The plan for the atrium is to propose creation of a cozy space for female college students by adding a building between the existing A building and the existing B building. In this atrium there is no restriction of utilization, such as no food, no drink or no whispers, and this will be a place of relaxation for the female college students.

An Approach to No Smoking
Education of Female Students
Miyuki IMAMOTO,
Toshiko MORISHITA
- The female
students'
smoking,
Passive
smoking,
Mother
- We have investigated about the smoking situation and passive smoking to the students belong to the department of food and nutritional science for about ten years. Especially, we had interests in their mother's influence on smoking. The smoking rate of students showed two percents. But the student's mother had the smoking custom, she felt uneasy about the cigarette smoke. Though she met with smoking scene from her presence, she could not say to stop smoking. Besides, the student numbers who answered that women should not smoke showed remarkably few. In the case that her mother smoked, it was suggested she was passive to no smoking.

Teaching Materials for Tanka Study in Elementary School Japanese Textbooks Since the First Year of Heisei (1988), Parts 1

Masaaki IRIE,

since Heisei, Japanese elementary textbooks, teaching materials for tanka, a Japanese poem of thirty-one syllables

Japanese elementary textbooks have been revised five times since the beginning of the Heisei era (1989). This paper lists all the tanka teaching materials that appeared in each Japanese elementary school textbook published by Tokyo Shoseki, Mitsumura Shuppan, Kyoiku Shuppan. They are the primary sources for this paper that examines tanka teaching materials in elementary schools.
